

Workshop on Time Series Analysis and Statistical for Official Statistics

CALL FOR PAPERS

December 8-9, 2026 – OECD, Headquarters (Paris), France

INSEE and the OECD are organizing a workshop on time series analysis and for official statistics.

This workshop offers an opportunity for official statisticians, academics and researchers in economics and statistics to discuss policy applications emerging from new state-of-the-art analytical tools and techniques.

This year's workshop topic sessions include (but are not limited to), the following:

- **Time Series Analysis**
 - Seasonal adjustment
 - Nowcasting
 - Trend Cycle estimation and Turning point detection
 - Business Cycle estimation
 - Revision Analysis
 - Using new features of JDemetra version 3 and rjdverse R packages
 - Experiences in statistical offices, central banks and other institutions
 - Implementing IA tools

Please send your abstract (Maximum two pages long). to anna.smyk@insee.fr and emmanuelle.guidetti@oecd.org before **September 30th 2026**.

The workshop will be hybrid (in presence and remote). Participation is free but **registration is compulsory**. For further information, please contact virginie.elgrably@oecd.org or consult the OECD community page:

<https://one-communities.oecd.org/community/workshop-on-time-series-methods-for-official-statistics/SitePages/Home.aspx>
